Editorial Notices

ALL ARTICLES submitted for publication in this journal must be typewritten with double or treble spacing and a wide margin. Carbon copies are not acceptable. Articles not conforming to these requirements will be returned to authors for necessary attention. Authors are requested to avoid the use of abbreviations, and not to underline words or phrases. Each article should be preceded by a summary which, while being as short as possible, will convey to the potential reader a fairly accurate idea of its scope and purport.

One author should be nominated to deal with requests for reprints, and his name and postal address should be given in a form suitable for use as a footnote to the article.

Author's alterations of type or illustrations on proof will be charged to the author if considered excessive. No charge is made for correction of printer's errors. No charge is made for illustrations up to the value of $50, but authors may be required to meet expense additional to this. Cost of colour illustrations is available on request.

Illustrations should be good quality photographic prints on glossy paper. Line drawings, charts, graphs, etc., must be drawn on thick white paper in Indian ink. Lettering must be large enough and clear enough to stand photographic reduction in size. For satisfactory reproduction of skiagrams, good prints are essential; contact prints of X-ray negatives, with blacks and whites reversed, are not acceptable. All figures should be sent unmounted, with their number and the name of the author marked lightly in pencil on the back. Legends to figures should be typewritten on a separate sheet of the manuscript. Authors' original illustrations will be returned only on request, which should be made within six months of publication, addressed to the Editor of this Journal, P.O. Box 116, Glebe, N.S.W. 2037.

References must be cited in the text in the form "Smith (1964)", and not by numbers, except (with the Editor's approval) in unusual papers—e.g., on historical or other non-medical subjects. They must be listed alphabetically at the end of the article, the following information being given: surname, initials of author, year, journal, volume, number of first page of article. If reference is made to a book, the following must be stated: surname, initials of author, year, full title of book, publisher, place of publication, page number where relevant. The abbreviations used for the titles of journals should be those given in the book "World Medical Periodicals", published by the World Medical Association, 10 Columbus Circle, New York 19, N.Y., U.S.A. If the proper abbreviation is not known, the title of the journal should be given in full.

All editorial communications, including reviews, should be addressed to the Secretary, Royal Australasian College of Surgeons, Spring Street, Melbourne, Victoria, 3000. Articles are understood to be offered to THE AUSTRALIAN AND NEW ZEALAND JOURNAL OF SURGERY solely, unless the contrary is stated. The copyright of articles appearing in this Journal is vested with the Royal Australasian College of Surgeons.

The views expressed in the Journal are not necessarily those held by the Council of the College.

Exchange journals should be addressed to the Librarian, Royal Australasian College of Surgeons, Spring Street, Melbourne, Victoria, 3000, Australia.

The subscription rate is $12.00 *per annum.*
